Wireframes using lucid chart

This UID flow illustrates how users (bankers and customers) interact with core elements of a banking system, including loans, accounts, and credit cards

ZCore Interactions

- Customer → Borrow → Loan
- Users apply for loans through a borrowing interface
- Customer → Customer Credit Card → Credit Card
- Users view/manage credit card data
- Customer → Account
- Users check balances, categories, and account info
- Banker → Banker Information
- Bankers manage their own profiles and customer assignments
- Loan → Loan Branch → Branch
- Loans are linked to specific branches where they are processed
